NOTICE OF RETRACTION

Reason: Extensive Plagiarism

Saudi Medical Journal is retracting this article after concluding that it has been extensively plagiarized (over 95% of the text) from a previous study by Meles H, Wolday D, Fontanet A, Tsegaye A, Tilahun T, Aklilu M, Sanders E, De Wit TF. Indeterminate human immunodeficiency virus Western blot profiles in Ethiopians with discordant screening-assay results. Clin Diagn Lab Immunol 2002; 9: 160-163.

Who are entitled for authorship?

Excerpts from the Uniform Requirement
updated November 2003,
available from website www.icmje.org

The international Committee of Medical Journal Editors has recommended the following criteria for authorship; these criteria are still appropriate for those journals that distinguish authors from other contributors.

Authorship credit should be based on 1) substantial contributions to conception and design, or acquisition of data, or analysis and interpretation of data; 2) intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3.

Acquisition of funding, collection of data, or general supervision of the research group, alone, does not justify authorship.

Author should be prepared to explain the order in which authors are listed.
